SUMMARY

Cyber Forensics student with a background in ethical hacking, coding, and digital forensics. Skilled in network, web, and wireless pentesting with a focus on offensive security and solid defensive knowledge. Experienced with SOC tools like Splunk, Wazuh, and Snort for threat monitoring and response.

EDUCATION

BSC CYBER FORENSIC , <i>Mahatma Gandhi University</i>	07/2023 – 03/2026 Kochi, Kerala
COMPUTER SCIENCE , <i>Govt. Higher Secondary School, Nedungolam</i>	08/2021 – 03/2023 Kollam, Kerala

WORK EXPERIENCE

ShadowFox , <i>CYBER SECURITY INTERN</i>	09/2024 – 09/2024
- During this internship, I gained valuable hands-on experience in threat analysis, network security, and forensic analysis. - While working with industry-standard tools to apply and enhance skills in real-world cybersecurity scenarios.	

SKILLS

Communication, Problem-Solving, Time Management, Critical Thinking, Networking, Linux, Windows, Vulnerability Assessment, Python, Criminal Investigations

LANGUAGES

English, Malayalam

CERTIFICATIONS

eJPT (eLearnsecurity Junior Penetration Tester) - ineSecurity
Microsoft Cybersecurity Analyst Professional Certificate - Coursera
Oracle Cloud Infrastructure 2023 AI Certified Foundations Associate - Oracle

HONORS AND RECOGNITION

#1 prize in CyberDome Kozhikode Summit CTF (DOMEKCD CTF) 2023

Apple Hall of Fame x3, *Apple*

Nokia Hall of Fame x4, *Nokia*

Acknowledged by NCIIPC, *NCIIPC*

NASA Hall of Fame, *NASA*

State of California Hall of Fame, *State of California*

ADDITIONAL INFORMATION

EXTRA-CURRICULAR ACTIVITIES

- Conducted cybersecurity awareness workshops for college students on best practices and emerging threats.
- Participated in workshops, hackathons, and CTFs to enhance skills and track industry trends.
- Created CTF challenges in web security, cryptography, reverse engineering, and forensics.

PROJECTS

C7LAB - Design and Implementation of Hands-On Vulnerable Cybersecurity Labs Based on Real-World Vulnerability Write-ups/CVEs	12/2025 – 03/2026
This project builds safe, containerized labs from real CVEs and write-ups to teach exploit and mitigation of flaws like SSRF, XSS, and SQLi and other system flaws.	
SHADOWTRAP - HIGH INTERACTION SSH HONEYPOT WITH REALTIME THREAT PROFILING	01/2025 – 10/2025
Built a Python SSH honeypot that simulates Linux to capture brute-force attacks, commands, and multi-port scans. Includes real-time Discord alerts and detailed logging for threat profiling.
